Colophon

This book was written in Microsoft Word X on various Macs around the country.

The screenshots were captured with Ambrosia Software's Snapz Pro X (www.ambrosiasw.com). Adobe Photoshop 7 and Macromedia Freehand (www.adobe.com) were called in as required for touching them up.

The book was designed and laid out in Adobe PageMaker 6.5 on a PowerBook G4 and Power Mac G4. The fonts used include Formata (as the sans-serif family) and Minion (as the serif body face). To provide the 🍏 and ⌘ symbols, a custom font was created using Macromedia Fontographer.

The book was generated as an Adobe Acrobat PDF file for proofreading and indexing, and finally transmitted to the printing plant in the form of PostScript files.
