Starting Up

About Dynamic Learning.....	1
Prerequisites.....	1
System requirements.....	1
Starting Adobe Flash CS3 Professional	2
Fonts used in this book.....	3
Resetting the Flash workspace.....	3
Loading lesson files	3
Working with the video tutorials.....	4
Setting up for viewing the video tutorials	4
Viewing the video tutorials with the Adobe Flash Player	5
Additional resources	6
Images and animations used in this book	6

Lesson 1: What's New in Adobe Flash CS3? 7

Starting up.....	7
Improved drawing tools.....	8
Copy and Paste Motion.....	9
Copy Motion as ActionScript 3.0	10
New Illustrator and Photoshop import options	11
Improved video import and export options	12
ActionScript 3.0 and Flash Player 9.....	13
Adobe Device Central	15
Common Adobe Creative Suite 3 interface	15

Lesson 2: Flash CS3 Jumpstart 17

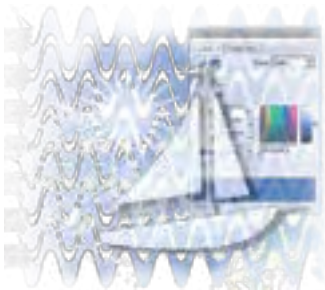

Starting up.....	17
What is Flash?.....	18
About Flash Player	20
Flash file types	21
Creating a new document.....	22
Setting up your new document.....	23
Saving your Flash document.....	24
Opening documents	26

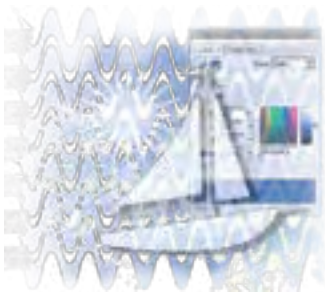

The Flash workspace	27
The Stage and work area	27
The Flash Tools panel.....	28
The Property inspector	30
Panels and panel groups	33
The Timeline	35
Practicing with the Flash tools	38
The drawing and selection tools in action.....	38
Using gradient and color tools.....	42
Animation in action	44
Copying and pasting motion between objects	46
Getting help	48
Support forums	48
Moving forward.....	49
Self study	49
Review	49

Lesson 3: Getting Started with the Drawing Tools **51**

Starting up.....	51
Drawing in Flash	52
Using the Merge Drawing model	52
Opening the completed file	52
Drawing shapes.....	53
Eliminating strokes.....	55
Using the Oval Primitive tool	57
Cloning your shape	60
Creating a symbol from your artwork	60
Using a motion tween to create the animation	61
Using the Object Drawing model	63
Using the PolyStar tool	63
Creating the rectangle shapes	64
Rearranging the order of the objects.....	67
Editing the drawing object	67
Adding text to the artwork	69
Adding strokes to text.....	71
Vector vs. raster graphics	74

Creating artwork using an imported graphic 74

Importing raster graphics 74

Drawing with the Pencil, Line, and Pen tools 76

Using the Pencil tool 76

Adjusting your drawing preferences 78

Using the Line tool 81

Using the Pen tool 83

Practice with curves 84

Using the Pen tool for curves 85

Creating curves with corner points 86

Drawing the sailboat 88

Creating the sail shapes 91

Saving custom colors..... 91

Filling your shapes with color..... 93

Self study 93

Review 94

Lesson 4: Modifying and Transforming Graphics **95**

Starting up..... 95

Grouping and arranging artwork 96

Arranging grouped graphics..... 98

Transforming graphics 100

The Free Transform tool 100

The Transform submenu..... 102

The Transform panel 104

Modifying Fill and Stroke colors..... 106

Working with gradients 106

Transforming gradients..... 109

Creating complex gradients 111

Modifying gradient colors 112

Adding and modifying stroke styles
and colors 115

Using the Eyedropper tool to sample
colors and styles 116

Unifying colors and styles across
graphics and type..... 116

Creating complex selections.....117
 The Lasso tool.....117
 Finishing the logo.....118
 Self study.....121
 Review.....121

Lesson 5: Using Symbols and the Library **123**

Starting up.....123
 What are symbols?.....124
 A look at the Library panel.....125
 Creating symbols.....126
 Converting a graphic to a symbol.....126
 Creating blank symbols.....131
 Building artwork with symbol instances.....133
 Positioning and snapping in symbol instances....133
 Editing and duplicating symbols.....136
 Editing symbols in place.....138
 Modifying individual symbol instances.....139
 Modifying instance color.....140
 Fine-tuning your background.....141
 Duplicating symbols.....142
 Adding graphics and text to your banner.....144
 Swapping symbols.....147
 Managing the Library.....149
 Organizing symbols with folders.....151
 The Move to New Folder command.....152
 Deleting items from the library.....154
 Controlling library views.....155
 Self study.....156
 Review.....156

Lesson 6: Creating Basic Animation **157**

Starting up.	157
A look at the Timeline	158
Importing a library	160
Building your frame-by-frame animation.	161
Organizing the Timeline.	161
First steps to animation: placing elements	162
Understanding frames and keyframes	163
The key to keyframes.	165
Ease In, Ease Out, and Rotate	166
Testing with Test Movie.	168
Frame-by-frame animation versus tweening	169
Timing and Onion Skins	169
Combining tweening with frame-by-frame animation.	171
Transforming graphics	173
Streamline your methodology.	174
Motion guides	176
Final animation steps.	179
The logo catches up.	181
Animating color.	183
Animating text.	184
Self study	186
Review	186

Lesson 7: Diving Deeper into Animation **187**

Starting up.	187
Creating shape tweens	188
Fine-tuning with shape hints	192
Placing shape hints	192
Distributing animation across multiple layers	196
Multiple layers for multiple fish	197
Dotting your (fish) eyes.	199
Reordering layers	201
Viewing layers as outlines	202
Organizing layers using folders	203

Editing multiple frames at once.....	205
Creating masks.....	207
Creating animated masks.....	210
Copying and pasting animation	211
Paste Motion Special	214
Moving, extending, and reversing animation.....	216
Extending tween length.....	216
Copying and reversing animation.....	217
Self study	220
Review.....	220

Lesson 8: Customizing Your Workflow 221

Starting up.....	221
Customizing workspace layouts	222
Opening the completed file	222
Working with panels	223
Stacking, shrinking, and storing panels	226
Managing workspaces	229
Setting preferences	231
Keyboard shortcuts	234
Visual aids for alignment	238
Rulers and guides	238
Guide layers	243
Advanced alignment.....	247
Refining your aligned objects.....	251
Self study	253
Review	253

Lesson 9: Working with Imported Files 255

Starting up.....	255
Import formats.....	256
Importing still images.....	258
Viewing the completed lesson file.....	258
Import a bitmap image.....	258
Adding text.....	262
Swapping out an imported file.....	264
Modifying imported artwork.....	265
Updating imported files.....	268
Importing Photoshop files.....	269
Importing a layered Photoshop file.....	269
Importing Illustrator artwork.....	274
Animating the Bat.....	277
Self study.....	279
Review.....	279

Lesson 10: Introducing ActionScript 281

Starting up.....	281
Exploring the lesson file.....	282
What is ActionScript?.....	283
ActionScript 2.0 or 3.0: which should you use?.....	283
An important note about Publish Settings.....	284
The Actions panel at work.....	285
Standard (default) script editing mode.....	285
Using Script Assist.....	286
Adding & removing actions.....	286
Adding actions to frames.....	287
Using stop()	287
Using the goto action to navigate the Timeline.....	289
Navigating to frame labels.....	294
Frame labels versus frame numbers.....	294
Self study.....	298
Review.....	298

Lesson 11: Creating Button Symbols **299**

Starting up.....299

Working with button symbols300

Building buttons301

Adding text to a button304

Duplicating and modifying buttons.....306

Aligning buttons on the Stage.....307

Testing buttons on the Stage308

Creating text-based buttons.....309

Navigating in Flash.....312

Building destination points313

Organizing the Timeline.....315

Setting up for new content.....315

Adding content to your frames317

Building the Services section318

Creating frame labels for ActionScript.....319

Adding ActionScript: event handlers
and functions.....321

Adding ActionScript to buttons.....321

Understanding events.....321

Adding a **stop()** action322

Linking buttons to specific frames324

Linking buttons to a web site.....327

Self study329

Review329

Lesson 12: Adding Sound to Your Movies **331**

Starting up.....331

Preparing sound files for Flash.....332

Sample rate and bit depth.....333

Editing your audio334

Mono or stereo335

Audio file formats.....335

Importing sounds.....336

Placing sounds on the Timeline.....338

Adding sound to your slideshow project.....338

Adding the remaining narration339

Adding sound effects to buttons.....	340
Placing Event sounds on button frames.....	341
Controlling sounds.....	343
Introducing stopAllSounds()	343
Editing sounds.....	345
Trimming sound.....	347
Repeating and looping sounds.....	349
Looping sounds.....	349
More sync menu controls: stop and start.....	350
Start sounds.....	350
Stop sounds.....	351
Sound publishing options.....	353
Self study.....	355
Review.....	355

Lesson 13: Introducing Movie Clips 357

Starting up.....	357
About movie clips.....	358
Creating movie clips.....	359
Laying the foundation: your first movie clip.....	359
Previewing movie clip animation from the main timeline.....	361
Creating the landing gear.....	363
Combining movie clips and main timeline animation.....	365
Nesting movie clips.....	367
Adding ActionScript to movie clip timelines.....	369
Controlling movie clip playback.....	369
Adding some variation to the propellers.....	371
Tweening movie clips.....	373
Adding a second tween.....	374
Combining movie clips for complex animation....	375
Adding filter effects to movie clips.....	377
Using the Filters panel.....	378
Creating a filter effect.....	379
Self study.....	381
Review.....	381

Lesson 14: Working with Video

383

Starting up.....383
 Video in Flash: formats and fundamentals.....384
 Internal versus external video385
 Working with embedded video385
 Importing with the Video Import wizard386
 Adding embedded video to the Timeline392
 Building controls for embedded video394
 Updating and exporting video.....397
 The Bandwidth Profiler398
 Working with linked video.....399
 Importing linked video400
 Working with the FLVPlayback component404
 Flash Video Encoder.....405
 Self study407
 Review.....407

Lesson 15: Delivering Your Final Movie

409

Starting up.....409
 The publishing process.....410
 Publishing to the Web.....410
 Customizing the Publish Settings411
 CD-ROM delivery.....415
 Creating a standalone projector415
 Making a full-screen projector416
 Using Export Movie419
 An overview of FTP (File Transfer Protocol)421
 Using Adobe Device Central in Flash.....421
 Self study424
 Review.....424
